Substack is the home for great writing

A little spin on your classic butter sauce. I poached the salmon in some veg scraps and whatever was laying around in the pantry and fridge. I simmered the poaching liquid for about 45 minutes. Make sure to heavily season your liquid and also season your fish before poaching. I poached the salmon to 125F internally. The poaching liquid was about 170F. I like to bring the poaching liquid to a simmer and then add the fish and keep the temperature just below simmering.

If your beurre blanc looks separated, most likely it's because it got too hot. You can fix this by whisking in an ice cube or a couple drops of cold water. If you're sauce becomes too thick, add a couple drops of the poaching liquid to loosen it up. If you're making this sauce ahead of time, you should add some heavy cream to the emulsification. It will help with stabilizing it. Enjoy!

Recipe: makes about 1 cup

- 1 medium shallot, minced
- 1/3 cup dry white wine
- 10 Tbsp unsalted butter, cold and cubed
- 3 Tbsp yuzu juice, or lemon juice
- 2 Tbsp salmon roe
- 2 Tbsp thinly sliced chives
- kosher salt, to taste

1. In a small sauce pan, sauté shallots with about 1 Tbsp of the butter. (keep 9 Tbsp remaining cold and aside)
2. Cook until soft and translucent. Add wine and reduce by half.

3. Whisk in a couple cubes of cold butter at a time, until a creamy emulsion forms and repeat process until you have used all of the butter. **
4. Stir in yuzu juice, salmon roe and chives and serve immediately.

**If you're not using sauce right away, add about 2 Tbsp of heavy cream to stabilize it.
